Dear Student,

I want you to know that it is my goal for you to learn more than mathematics in this classroom. You will understand mathematics at a deeper level but you will also be a better group member, communicator and a deeper thinker. This will take much effort on my part and on your part but I know we can accomplish this goal if we trust each other. I want you to know that I am going to be respectful of you, encouraging of you and I will not put limitations on what you can accomplish in this class. It is my hope that you do not limit yourself either. I will also be challenging you to think differently than you may be used to and I hope you extend the same courtesy to me. It is going to be hard for both of us but there is nothing that cannot be accomplished through devotion and effort. I look forward to getting to know you and I hope we can help each other reach our full potential.

Sincerely,

Nathan Warnberg
